ABOUT ME

As a highly motivated professional, I am committed to constantly improving my skills and contributing to the development and enhancement of products and processes within the organizations I work with. With over 3 years of experience in systems development across various programming languages and an additional 3+ years in frontend development, I possess a comprehensive understanding of the entire environment. My focus has always been on developing customer-centric solutions that improve their experience with our products. I am currently seeking new opportunities to apply my expertise and leverage my experience in developing innovative solutions that can help organizations remain competitive in the market. I am confident that my skills and experience will make a significant contribution to any team that I join.

PROFICIENCY STACKS

Javascript	3 years	ReactJS	3 years
Typescript	2 years	Nextjs	3 years
HTML	3 years	Git / Github	3 years
CSS	3 years	GraphQL & Apollo server	1 year
Node	2 years	Firebase | MongoDB | PostgreSQL	2 year

- Frontend Solutions for big projects.
- Knowledge in UX and UI using Figma or Adobe pack.
- Mentoring and leadership, I like to do presentations and write articles.
- Problem-solving, team worker, self-taught, fast learner;
- Communicative, empathetic, resilient, organized.

WORK EXPERIENCE

Frontend Engineer
Cyrela -
The largest and most valuable residential construction company in Brazil.

📅 Oct 2022 – Current   📍 Latin America   Business area: Construction and Tech

Project 1 & 2: Sell.it - Web and Mobile Cross-Platform
- Main goal: Brokers' agenda to reserve positions at Cyrela, Living and Vivaz points of sale, follow your agenda and schedule yourself.
- Details and responsibilities: I'm the main Front-end developer of my team. Which means I architected 3+ projects with 2000+ daily users, with thousands of requests.
- Outcome: 15% increase in sales after the rollout in the main regions of the country
- Technologies: JavaScript · React.js · Front-End Development · TypeScript · Next.js · React Native · API REST · ESLint · Web Design· npm · React Hooks · JSON Web Token (JWT) · HTML · Styled-components · Node.js

- Link for Apple Store: https://apps.apple.com/br/app/sell-it-agenda-de-corretores/id1583818111

Project 3: User Admin
- Main goal: Allow managers to check and have data about their brokers. Thus doing all the management of users of other projects.
- Details and responsibilities: I'm the main Front-end developer of this project. Architecting the entire structure of the project
- Technologies: JavaScript · React.js · Front-End Development · TypeScript · Next.js · React Native · API REST · ESLint · Web Design· npm · React Hooks · JSON Web Token (JWT) · HTML · Styled-components · Node.js

Full Stack Engineer - Focused at Frontend
Fpass
Company's brief description:

📅 Apr 2022 - Oct 2022   📍 São Paulo   Business area: EdTech and Fintech

Project 1: Fpass Streaming
As a Fullstack Developer, responsible for building and maintaining their streaming platform for EDtech.
Fpass is a Lifelong Learning ecosystem with the purpose of transforming education.
I used technologies like React, Node.js, and Firebase to create a user-friendly experience for learners and educators.

Basically, I made learning online super easy and fun for everyone !

Frontend Developer
Uol Group
Company's brief description: UOL is the largest Brazilian content, technology and digital services company.

📅 Sep 2021 - Mar 2022   📍 São Paulo   Business area: Edtech

Building websites for education at the main companies at Latam.

Project 1: Tim - The Largest Mobile Network in Brazil

Project 2: Santander - The largest bank in the euro zone and one of the largest in the world.
Project 3: PagSeguro - The pioneer and leader in the Brazilian market of online payment methods.

Full Stack Developer - Focused at Frontend
Boostech -
The largest and most valuable residential construction company in Brazil.

📅 Mar 2021 - Oct 2021   📍 Latin America   Business area: Construction and Tech

Project 1 & 2: Sell.it - Web and Mobile Cross-Platform

One of the key aspects of my work has been transforming all the web Frontend to a mobile APK that runs in Zebras Handhelds, and understanding the unique requirements of each company that we work with, and developing custom solutions that are tailored to their needs. This has involved working closely with clients to gather requirements, design user interfaces, and develop features that streamline and optimize their warehouse operations.

- Main goal: As a software developer at Boostech, I have had the opportunity to work on developing applications for companies focused on logistics storage and warehouses, also known as Warehouse Management Systems (WMS).
- Details and responsibilities: In this role, I have been responsible for creating both web and mobile applications, using a range of programming languages and development tools.
- Outcome: Bootstrapped and launched the first solution that allowed the company to become a Software House.
- Technologies: JavaScript · React.js · Front-End Development · TypeScript · Next.js · React Native · API REST · ESLint · Web Design· npm · React Hooks · JSON Web Token (JWT) · HTML · Styled-components · Node.js · Laravel · PHP · PostgreSQL

Project 3: User Admin
- Main goal: Allow managers to check and have data about their brokers. Thus doing all the management of users of other projects.
- Details and responsibilities: I'm the main Front-end developer of this project. Architecting the entire structure of the project
- Technologies: JavaScript · React.js · Front-End Development · TypeScript · Next.js · React Native · API REST · ESLint · Web Design· npm · React Hooks · JSON Web Token (JWT) · HTML · Styled-components · Node.js

Full Stack Developer - Focused at Frontend
Freelancer - Vetrin

 I created and organized a company that provides services directly to over 20 companies in Brazil, with the creation of e-commerce, landing pages, and various info products. During my journey providing services, I worked as a front-end developer for HCL Tech (an Indian-based company with English communication), providing services for AVON here in Brazil.
In July 2020 I sold the company.

- 📅 Jul 2020 - Oct 202

EDUCATION

Bachelor's in Computer Engineer
University of Vale do Paraíba

📅 Jan 2020 – Jan 2022 (Leave of Absence)

Bachelor's in Computer Science
University of Anhembi Morumbi

📅 Jan 2022 – Jan 2023
